PROFESSIONAL SUMMARY

A Software Engineer specializing in website and mobile application development with strong expertise in Full Stack and Cross-Platform Development. Skilled in building responsive, scalable, and user-focused applications using modern development technologies. Passionate about developing innovative software solutions with a strong foundation in problem-solving, software testing, and Data Structures & Algorithms. Dedicated to creating impactful digital experiences through clean design, efficient development, and continuous learning.

PROFESSIONAL EXPERIENCE

Keep Active Pro AI Solutions Pvt Ltd,

01/2026 – Present | Pune, Maharashtra

Software Developer Intern

- Worked on responsive website development using modern frontend technologies.
- Contributed to mobile application development for the MeterRide ride-hailing platform.
- Developed UI components and integrated application features for improved user experience.
- Collaborated with development teams for debugging, testing, and feature enhancement.
- Participated in the software development lifecycle including design, development, and deployment.

SKILLS

Full Stack Development | Mobile Application Development | Cross-Platform Development |
React.js | React Native | JavaScript | Python | Machine Learning | Software Testing |
API Integration | Responsive UI/UX Design | Data Structures & Algorithms | Firebase | MySQL |
Git & GitHub | Problem Solving | Team Collaboration | Leadership

PROJECTS

VETMEDS – AI-Powered Veterinary Care Platform,

11/2024 – 11/2025

Web Developer & Team Lead

- Developed an AI-powered veterinary healthcare platform focused on pet health monitoring and assistance.
- Implemented features including symptom analysis, doctor locator, emergency SOS, and pet health management.
- Designed responsive and user-friendly interfaces for improved accessibility and user experience.
- Integrated secure data handling and real-time functionality for efficient healthcare support.
- Led project coordination and collaborated with team members throughout the development process.
- Technologies Used: React.js, Python, Firebase, HTML5, CSS3, JavaScript, REST APIs

MeterRide – Ride-Hailing Mobile Application

- Developed a cross-platform ride-hailing mobile application with real-time meter-based pricing.
- Implemented live location tracking and route-based functionality.

- Designed responsive and interactive mobile UI/UX interfaces.
- Contributed to feature integration, testing, and application optimization.
- Technologies Used: React Native, Firebase, JavaScript, Google Maps API

EDUCATION

Rajarambapu Institute of Technology, Ch. Shivaji University, 2021 – 2026
Rajaramnagar, Islampur, Maharashtra
Bachelor of Technology in Computer Science Engineering
- CGPA: 7.5
- Minor Degree: Automobile Engineering (Robotics & Automation)

Ligade-Patil Junior College of Science, 2019 – 2021 | Karad, Maharashtra
Higher Secondary Certificate (Class XII)
- Percentage: 87.50%

Vidyaniketan English Medium School, 2015 – 2019 | Islampur, Maharashtra
Secondary School Certificate (Class X)
- Percentage: 87.60%

LANGUAGES

English (Fluent) | **Hindi** (Fluent) | **Marathi** (Fluent)

ACHIEVEMENTS & ACTIVITIES

Sports Achievements

- Represented football teams at national and state-level competitions.
- Represented renowned football clubs including Mumbai City, India Rush Soccer Club Mumbai, and Sangli FC.

CERTIFICATIONS

Machine Learning – NPTEL | Data Structures & Algorithms in Java – Infosys Springboard |
Cloud Computing | Generative AI Fundamentals – Databricks |
Quality Assurance (QA) – Techniques and Methodologies
